To Whom It May Concern,

I am writing in support of Ironbound Community Corporation's (ICC) application for US EPA's Community Action for a Renewed Environment (CARE) Program, Level I grant. This organization has a rich history of environmental advocacy and collaborative problem solving.

As proposed in their application, we commit to partnering with ICC as a participant in the Ironbound Community Risk Reduction Stakeholder Group. As a participant we will help identify environmental risks in the community and work collaboratively with the group to help determine priorities for risk reduction to improve the health and environmental conditions of the Ironbound.

ICC's application has our full support and participation. We look forward to working with this group to improve the quality of life in the community for this and future generations.

Sincerely,
